

Certificate of Examination of Nursery Stock

To Whom it May Concern:

Raleigh, N. C., Sept. 15, 1900

This is to certify that on July 21, 1900, the nursery grounds of Harlan P. Kelsey, Kawana, at N. C., were inspected; that the growing stock was apparently free from any pests designated as dangerous by this Commission, and was otherwise healthy. This Certificate expires September 1, 1901, and applies only to stock grown in the aforesaid nurseries.

Approved for the Commission:

[SEAL]

S. L. PATTERSON, Chairman

IMPORTANT

Read Before Ordering,

My Hardy Stock is shipped direct from Highlands Nursery, in the western North Carolina mountains, from **Cranberry, N. C., freight station**. The freight rate to New York, Boston and Philadelphia is \$1.14 per 100 pounds. Special low express rates.

I claim superior packing, my export shipments reaching the most remote countries in perfect condition. *Packing charged for at cost.*

Foreign Remittances should be sent by International Postal Money Order, drawn on Boston, Mass., Post Office, or by New York or Boston Exchange. An American dollar is equal to a little more than four (4) English shillings, four (4) German marks, or (5) francs.

Claims must be made immediately on receipt of goods. *All shipments travel at consignee's risk.* Shipping begins about September 15 and lasts till December, and in spring from March 1 to May 15.

Growing Rhododendrons, Azaleas, Kalmias, Hemlocks and plants of this class in wholesale quantities will continue to be my specialty. All the leading Parks, Cemeteries and Nurseries of America as well as those abroad, have been satisfactorily supplied in the past with many hundreds of thousands of plants from my **Highlands Nursery**.

Correspondence with all Parks, Cemeteries, Nurseries and Botanical Gardens in America or abroad especially solicited.

COLLECTED PLANTS

Nearly all plants offered in this Catalogue are heavy, nursery-grown, but can usually be supplied in strong collected stock, when desired.

My facilities are unapproached elsewhere for collecting the best stock at a low cost, and an experience of 15 years and well-trained collectors enable me to assure buyers that orders for "collected" plants will receive the same attention and care as though I intended planting the stock myself. As a rule, however, I do not recommend the extensive use of collected stock and cannot guarantee it in any instance.

Rhododendrons, Kalmias, Leuchthoe catesbaei, Galax aphalla, and other broad-leaved evergreen shrubs and ground-covering plants are collected by the carload for use in producing immediate effects by massing. This subject requires special correspondence.

LANDSCAPE ARCHITECTURE.

Plans for planting and otherwise improving Parks, Cemeteries, or other public or private grounds carefully prepared, and contracts will be made for superintending entire construction and supplying all material.

AS TO HARDINESS.

The location of **HIGHLANDS NURSERY**, at the summit of the Blue Ridge, in western North Carolina, 3,800 feet among the clouds, and under the shadow of the great Grandfather mountain (the highest peak in the Blue Ridge range) insures long, cool summers and cold winters, which are very favorable to the growth of these beautiful native ornamentals, producing a perfectly **hardy** stock—a most important point with northern planters. The thermometer often reaches an extreme of 10° to 15° below zero, and every few years will go as low as 20° or more below.

The Azaleas, Rhododendrons, and most of the ericaceous plants herein offered thrive best in rich, peaty soils and partially shaded situations. **A good soil can be made** by excavating 2 to 3 feet of the surface, and filling with equal parts of good leaf-mold or other decayed vegetable matter and surface loam, with one-tenth or more of sharp sand. Swamp muck or field sod may be used. Mulching (spent tan, moss, leaves, hay, etc.), is always useful, and is necessary where the ground is very dry. Lime, **in large quantities**, in any form is very damaging to Rhododendrons, Azaleas, and ericaceous plants in general. As a rule, give the plants a deep soil, with plenty of well-decayed vegetable food and good drainage, and the result will be satisfactory. **Always give Rhododendrons a northern exposure where possible.**

SURPLUS

Stock offered by

HIGHLANDS NURSERY

All transplanted and extra heavy, excepting where specially noted. Packing at cost

Having decided to reduce my stock materially in some lines, I make the below special offers at very low prices for extra strong stock. Orders should be placed at once to take advantage of the offer. Not less than one hundred plants will be supplied at these rates where plants are offered by hundreds, or ten plants where offered in less quantities than hundreds.

AZALEAS.

The American Azaleas are among the choicest of all ornamentals, whether exotic or native, and were but rarely seen in cultivation before being disseminated by HIGHLANDS NURSERY. Large masses of "Great Flame-Colored Azalea," *calendulacea*, when seen in flower, present the most gorgeous effects, the shadings varying from deep crimson to a bright sulphur-yellow, and its complete hardiness is unquestionable. The foliage of *A. arborescens* is the finest of all the Azaleas, remaining a clear, shiny green throughout the summer, a characteristic not usual with this family. The large, white, sweet-scented flowers appear the last of all the Azaleas, and the numerous pink-tipped stamens protruding, give a most beautiful effect. *Azalea vaseyi* is one of the finest introductions of late years, the flowers appearing before the foliage in April in the greatest profusion, white to deep pink; attains a height of 12 to 15 feet. *A. nudiflora* (deep pink) and *A. viscosa* (white) are pretty, dwarfer varieties, very useful in the under shrubbery.

The only large and fine stock in the world of American Azaleas is now growing in the HIGHLANDS NURSERY, all heavy plants with balls and full of flower buds, excepting perhaps some of the smallest sizes.

This grand new Hemlock, introduced by us, possesses a distinct pyramidal growth, and attains a height of 40 to 50 feet. Its dense, dark foliage and graceful habit are only approached by some of the finer Japanese Hemlocks, which it somewhat resembles. Some fine specimens, 12 to 15 feet high, are now to be seen in the Arnold Arboretum, and are the first plants of this Hemlock ever sent out, being supplied by us to Prof. C. S. Sargent, Director, in 1884.

EVERGREEN SHRUBS.

The following (mostly broad-leaved) Shrub Evergreens are of greatest value for massing and for ground covering. All are perfectly hardy, and most of them produce a grand show of flowers. It is needless here to more than call attention to the large stock of *Rhododendrons* and *Kalmia latifolia* offered below. All are carefully transplanted and cultivated, and are clean and stocky. I have special methods of growing, gained by long experience, which insures healthy, well-ripened wood and good balls on roots, and the large quantities grown enable me to produce and sell at extraordinarily low prices. They will also be collected to order cheaply in any quantities. (See page 15.)

A specialty is made of collecting to order by the carload clumps and large plants of *Rhododendron maximum*, *Kalmia latifolia*, *Leucothoe catesbeii*, and others, which are sure to grow and produce a fine immediate effect. Cost for this service gladly estimated, and correspondence invited, particularly from Landscape Gardeners and Park and Cemetery Superintendents.

hardy evergreen undershrub covering of lasting beauty, being a rich green in summer and coloring vivid bronze tints in autumn and winter, an effect which must be seen to be appreciated.

	Size	Per 10	100	1,000
AMPELOPSIS arborea	12 to 18 in.	\$2 00		
" quinquefolia . Strong 3-yrs.		1 00	\$7 00	\$60 00

AMPELOPSIS ENGLEMANNI. This is the clinging form of the well-known Virginia Creeper, and was introduced by us several seasons ago. The leaves are much thinner and smaller than in the ordinary variety, and the whole plant lacks the coarseness that characterizes *A. quinquefolia*, and it clings to walls like the ivy. The fall coloring is exceedingly brilliant, and in every way it is vastly superior to the common form, which is not used where the new variety is known and can be had. A fine stock ready for fall delivery. Strong, 75 cts. for 10, \$4 per 100, \$35 per 1,000; heavier, \$1 for 10, \$7 per 100, \$60 per 1,000.

NATIVE FERNS.

A good collection of hardy native Ferns suitable for park and cemetery planting, including the following varieties:

Adiantum pedatum,
Aspidium acrostichoides,
Aspidium marginale,

Aspidium spinulosum,
Dicksonia punctilobula,
Onoclea sensibilis,

Osmunda, in 3 vars.,
Polypodium vulgare,
Pteris aquilina.

Also a rare collection of **California Ferns**, some never offered before. Write for list.

	Per 10	100	1,000		Per 10	100	1,000
Adiantum pedatum, Maidenhair Fern	\$1 00			Camptosorus rhizophyllus, Walking-Leaf Fern	\$0 60	\$4 00	
Aspidium acrostichoides, Dag-ger Fern	75	\$5 00	\$30 00	Cystopteris bulbifera	1 00

LILIUM GRAYI (Gray's Lily). (Introduced by Harlan P. Kelsey.) Since introducing this beautiful and rare Lily in 1888, many thousands have been sent out to all parts of the world, and it is considered one of the best, most distinct and showy of the family. First size, \$12.50 per 100, \$80 per 1,000; Second size, \$7 per 100, \$50 per 1,000.

<i>Lilium humboldtii</i> (puberulum). 3 00
" philadelphicum. 1 00 7 00
" washingtonianum 3 00

LILIUM SUPERBUM (Turk's-Cap Lily). No description will do justice to this magnificent American Lily. A clump of them is literally a "blaze of scarlet and gold." For years we have made the growing of this Lily a specialty, and have sent out over a hundred thousand bulbs. Our stock this season is very fine, and we are offering at a low price, for the benefit of large planters and those wishing to catalogue it. Of special use for planting in Rhododendron beds. Special prices: First size, 75 cts, for 10, \$4 per 100, \$30 per 1,000; Second size, 50 cts. for 10, \$2.50 per 100, \$20 per 1,000; Third size, 25 cts. for 10, \$1.50 per 100, \$10 per 1,000.
